Tour Overview

We'll head out for a lovely drive along the Golden Circle. Golden Circle. [Þingvellir National Park] is the only location on the Icelandic mainland to hold UN ESCO World Heritage status, and it is also the site of Iceland's ancient parliament. [The Geysir geyser] erupts every 1 to 2 minutes, gradually subsiding in between, creating a magnificent display. [Gullfoss (Golden Falls)] features two levels of cascading water. When the sun is out, the water droplets from the falls reflect a rainbow, giving the waterfall a golden brilliance—hence the name "Golden Falls." We will also visit to [Kerið crater lake], known for its vibrant green water and the striking colors of the crater on the surrounding hillsides. Overnight in the south of Iceland. *Should weather conditions permit, the aurora may be visible near the hotel that night.

The Northern Lights in Iceland are a natural phenomenon caused by charged particles from the Sun colliding with the Earth's atmosphere high above. The success of a Northern Lights tour is highly dependent on weather conditions. Therefore, we cannot guarantee that you will definitely see the Aurora.

***Please note:

Iceland's unique geographical location offers spectacular and extraordinary landscapes, but the weather can be highly unpredictable. For safety reasons, our experienced guides will adjust the itinerary in real time based on actual weather conditions.
