Day 1 Reykjavik  Thingvellir National Park  Bruarfoss Waterfall  Geyser Geothermal Area  Gullfoss Waterfall  Kerid Volcano Crater  Reykjavik

Tour Overview

On the day of your scheduled tour, we will pick you up from your chosen bus stop or hotel in Reykjavík and embark on an unforgettable adventure through Iceland's most famous route – the Golden Circle. [Thingvellir National Park] One of the most remarkable natural wonders in the world is located at Thingvellir National Park, where visitors can witness the results of two drifting tectonic plates: the North American and Eurasian one. "Thingvellir" translates to "Parliament Plains". This makes the park an essential destination for those interested in Icelandic culture and history. [Bruarfoss Waterfall] This waterfall is truly a hidden gem located in Iceland's secret breathtaking landscapes, often referred to as "Iceland's Bluest Waterfall". [Geysir Geothermal Area] The Geysir geothermal area hosts many powerful hot springs. Among them is Strokkur, a geyser that shoots up to 35 meters every 5-10 minutes. [Gullfoss Waterfall] The melting water of Langjökull, Iceland's second-largest glacier, cascades into a deep canyon to create the awe-inspiring "Golden Falls." On clear days, you can even catch a glimpse of Langjökull in the distance, with the mist from the waterfall creating a beautiful rainbow effect. This is an ideal spot for a breathtaking photo opportunity! [Kerid Volcano Crater] Kerid is a volcanic crater known for its vibrant contrast of colours. The approximately 6,500-year-old volcanic crater in South Iceland is undoubtedly the perfect Golden Circle detour. Back To Reykjavík Our return to the Reykjavik capital area is planned for approximately 5 pm; however, the schedule order and return time may be subject to changes based on weather and road conditions.

Old site of the ancient parliament of Iceland (open-air parliament)

Geysir Geyser

Gullfoss Waterfall

[Old site of the ancient parliament of Iceland (open-air parliament)]

This is the site of the world's oldest democratic parliament, located next to a long, wide fault. This fault is the junction of the Eurasian plate and the American plate.

[Geysir Geyser]

Geysir , sometimes known as The Great Geysir, is a geyser in south-western Iceland, that geological studies suggest started forming about 1150 CE.

[Gullfoss Waterfall]

The name Gullfoss means "Golden Falls," and it's known for its powerful cascade. Gullfoss is fed by the Hvita River and plunges into a dramatic canyon, creating two distinct drops that total around 105 feet (32 meters) in height.
